First-quarter share price successes

The first quarter of 2019 saw a recovery for biopharma indices, particularly the NBI, following a slump for the sector at the end of 2018. Shown below are the biggest single-day share price gains in biopharma over those 3 months. Notable clinical successes for smaller companies formed the majority of the catalysts.

Q1 2019's largest single-day share price gains*

*Excludes companies with a market cap. movement of less than US\$35m; Source: EvaluatePharma
